(54) Title: A MIXED ANIMAL FEED

(57) Abstract: A mixed animal feed is provided comprising a conventional grass based feed admixed with up to 60% by weight of  
by-product grape seed optionally mixed with grape husks. The conventional grass based feed may include lucerne hay. Preferably,  
the grape seed and, where present, grape husks, have been pre-treated with at least one, and typically a combination of, tannin  
degrading bacteria that is or are conveniently tannin-hydrolysing lactic acid bacteria. The grape seed would typically be milled prior  
to contacting it with a suspension of bacteria followed by pelletising the treated grape seed and husks, where present.
